## Foreword

The mission of education is to provide for the future and to ensure that the younger generation can grow up as citizens able to face the challenges of the future with confidence. The changes instituted in the grade 11 school curriculum with these objectives in mind came into effect in 2007; this textbook is a result of that aim.

It is your duty to make the maximum use of this textbook, handling it carefully so that you can hand it over to your sister or brother who will take your place in grade 11 the following year.

The state provides free school textbooks for over 4,500,000 students in the country. You must look after your books carefully, so that they can be reused. Then, you can be proud that you have added your mite to the national assets.

I wish to take this opportunity to thank the writers, the editors, the members of the evaluation boards, the officers of the Educational Publications Department and all others who have contributed to the compilation of this book.
